"Two Ways of Looking at It."

Both wrong. Twelve inches is the normal distance at which perfect eyes see best and easiest. Holding books or paper differently means eye strain—means an error in refraction or defective muscles—means grave harm sooner or later. "A glass in time saves"—slightly changed, but you know the import, and eyes are more important than stitches.

ROOSEVELT AND DIETRICH

People Gather by the Hundreds to See and Hear the Next Vice President and Governor of Nebraska.

Hon. Jas. Wilson, Secretary of Agriculture, Addresses a Large Audience in the Afternoon.

The citizens of Custer county had the honor yesterday of seeing and hearing speak in Broken Bow, Gov. Theodore Roosevelt, Senator J. P. Dolliver, Hon. James Wilson, a member of the president's cabinet, and C. H. Dietrich, the republican candidate for governor. A number of the other candidates for state offices on the republican ticket, and Judge Kinkaid, candidate for congress, were present.

Notwithstanding the early hour, 8 a. m., fully 2,000 people had congregated at the depot before the arrival of the special which carried the Roosevelt party, to extend a welcome to our distinguished guests. On the arrival of the train the reception committee took the party in charge, and conducted them to the stand that had been erected on the vacant lots south-west of the depot, proceeded by the cornet band. The meeting was presided over by Mayor Royse, who introduced the speakers. Gov. Roosevelt who was the first speaker, spoke 23 minutes and was frequently applauded. Senator Dolliver, of Iowa, who gave the audience a

thirteen minutes talk was followed by C. H. Dietrich who after expressing his appreciation of the reception closed by joining in with the crowd in three rousing cheers for McKinley and Roosevelt as the train whistle for starting.

Hon. James Wilson was introduced and after a few remarks adjourned the meeting until 2 o'clock in the afternoon at the opera house. At the afternoon meeting a large crowd assembled. The exercises were opened with a song by the Parks Imperial Quartette, of York. The first speaker was Joseph Pigman who after a few words gave way for Secretary Willson. Again the quartette favored the audience with another selection of music. For more than an hour secretary highly entertained his audience and was highly appreciated. His speech was principally along the line of expansion of trade and prices under McKinley's administration over that attained the four years previous under free trade and democratic theories.

Baking Powder Economy

The manufacturers of Royal Baking Powder have always declined to produce a cheap baking powder at the sacrifice of quality.

The Royal is made from the most highly refined and wholesome ingredients, and is the embodiment of all the excellence possible to be attained in the highest class baking powder.

Royal Baking Powder costs only a fair price, and is cheaper at its price than any similar article.

Samples of mixtures made in imitation of baking powders, but containing alum, are frequently distributed from door to door, or given away in grocery stores. Such mixtures are dangerous to use in food, and in many cities their sale is prohibited by law. Alum is a corrosive poison, and all physicians condemn baking powders containing it.
